

## Keep Tom Wheeler's Net Neutrality Laws

Why is the USA reversing Tom Wheeler's (previous FCC chairman's) net neutrality accomplishment? Why?

Tom Wheeler listed to the people and he supported net neutrality strongly. I strongly support Mr. Tom Wheeler. A wise FCC Chairman that has a strong vision for America's future economy.

The current chairman, an Indian-American, Mr. Ajit Varadaraj Pai, is taking bribes from big US corporations (especially ATT, Verizon, Sprint etc..) *as if he is currently living in India, where bribes are very common.*

The country of India passed net neutrality. The people of India supports strong net neutrality. The Facebook CEO Mark Zuckerberg went to India for a special "FREE BASICS" custom internet package for the poor. The 1 billion SAID NO TO FACEBOOK FREE BASICS. *India is smart to keep the lanes open, even with terrible infrastructure.*

Does the USA want Facebook like Free-Basics? Internet packages handed by corporations to the American people? Different lanes based on speed for special interests or VIP customers?

So, the Indian-American Pai needs to go to India where his roots are from and accept Net Neutrality. Go live there in the slums or ask the Indian IT professional in Bangalore about Net Neutrality. They will side with Mr. Tom Wheeler.

Continue Tom Wheeler's accomplishments on Net Neutrality.

Wise Tom Wheeler and young Ajit Pai
